## Foreign Science & Technology Information Sources

## in the Federal Government and Select Private Sector Organizations

This Foreign Science & Technology Information Sources provides an overview of the mandate, functions and key contacts of U.S. federal and select private sector organizations that monitor, collect, disseminate, or conduct analysis of information involving foreign science and technology. These organizations include U.S. government departments, agencies, military services, and private sector organizations.

Jointly funded by the Departments of Commerce and State, the *Foreign Science & Technology Information Sources* seeks to improve private sector understanding of and access to U.S. - based resources related to foreign science and technology, including programs, publications, services, and expertise. To ensure that the most current information is available, the *Foreign Science & Technology Information Sources* lists wherever possible internet homepages and e-mail addresses of participating organizations.

The information in this *Foreign Science & Technology Information Sources* has been reviewed by participating organizations. It is based upon documents such as program descriptions, brochures, Congressional testimony, annual reports, mission statements, management instructions, and other original works.
